Manufactured by

THE HOWARD MILLER CLOCK CO.

Zeeland, Michigan

Airy, lighthearted "Bubbles," designed by George Nelson, make lamps and lighting fixtures that delight the eyes and warm the heart. Their pleasing, rounded shapes are fashioned in sturdy, lightweight steel and a special translucent white plastic. Use any incandescent or colored light bulb from 25 to 300 watts—the "Bubbles" will always cast a soft, even light. A variety of shapes and sizes . . . and a choice of accessories turn the basic "Bubbles" into ceiling pulley fixtures, floor lamps, table lamps or wall pin-ups! Exceedingly practical, the Bubble Lamps may be washed on the outside with a soft brush, mild soap suds and warm water, and cleaned on the inside with vacuum cleaner attachments.
